

Companies at BIOPARC LYON®

BIOPARC LYON® hosts life sciences companies and research teams, with the aim of becoming a leading biotechnology cluster in Europe.

CLARA

The Clara Cancer Cluster brings together public-sector research groups, clinical centers and companies within innovative, ambitious, patient-focused anti-cancer programs.

ERYtech Pharma

ERYtech Pharma specializes in the encapsulation of therapeutic molecules or enzymes within human erythrocytes. This promising technology can markedly improve the therapeutic index and biodistribution of the encapsulated molecules.

Améthrine

Améthrine develops innovative diagnostic technologies in the field of epilepsy.

Hikma Biotech

Hikma Biotech is a subsidiary of the Jordanian pharmaceutical company Al Hikma Pharmaceuticals, a specialist generic drug manufacturer employing more than 1500 people worldwide.

Étoile, a next-generation oncology research and treatment center

BIOPARC LYON® might welcome the French national carbon ions hadrontherapy projet. This exceptional equipment will enable to use the latest oncology technology, to treat a large panel of radioresistant and profound tumors. This project will mobilize eleven research laboratories from the CNRS, the INSERM and the GEA, and put BIOPARC LYON® in position to spearhead the global clinical research in oncology.

Thémis

Themis provides high-level consulting services addressing clinical development and pharmaceutical marketing for innovative therapies.

Bio-Imaging

Theralys provides cutting-edge medical imaging services for deployment in multicenter clinical trials.

Vet Diagnostics

Vet Diagnostics offers a range of unique pathology services to stakeholders in healthcare and veterinary research.

VISOON

VISOON develops computerized decision support systems based on automated image characterization (organs, tissues, cells). VISOON software is aimed at medical research laboratories, pharmaceutical and biotech companies and physicians.

Tooth PCS

Tooth PCS develops innovative ceramics systems for dental prostheses that bring practitioners unrivaled precision at up to eight times lower costs: crowns, veneers, inlay/onlay, bridge repairs, etc.

Novealis

Novealis creates advanced, healthcare-specific IT-solutions: relational database management, medical databases, medical dashboards, secure medical data exchange, multimedia applications, etc.
